Hitachi Selects Quake Global as a Partner for M2M Telecommunications Products

Quake Global, Inc. (QUAKE), a leading provider of mobile communication devices for M2M (machine-to-machine) markets, announced an agreement with Hitachi to supply a variety of telecommunications solutions for Hitachi's Construction Machinery deployed worldwide.

Quake Global's product family for Hitachi establishes a new era in the ability to both monitor and control Hitachi's assets as well as other heavy and light equipment assets. The Hitachi product family showcases the uniqueness of the Hitachi solution by incorporating proprietary Hitachi technology with proprietary QUAKE technology and combining multiple communication network capability with large data processing capacity to create a state of the art solution in a single package.

Hitachi Construction Machinery is a leading manufacturer of construction machinery that meet global requirements. Hitachi's corporate philosophy is to be active in the evolution of "machinery" and the synergy between "human" and "business" that combines to create rich living spaces, making them more comfortable, highly developed and efficient.

“The variety of products that QUAKE is delivering to Hitachi is the next step in the evolution of communication devices that combine multiple network architectures into a single device that can communicate from virtually anywhere around the world. With the ability to locate, monitor, and control equipment, combined with the ability to process large data, the Hitachi product family enables Hitachi to continue to innovate in the creation of intelligent machinery,” stated Polina Braunstein, President and CEO of Quake Global.

About Hitachi Construction Machinery

The commitment of Hitachi Construction Machinery to the North American and Latin American markets is significant. With manufacturing facilities in Banshu, Ryugasaki, Tierra, Hitachinaka-Rinko and Tsuchiura, Japan, and the U.S. Corporate office and campus in Newnan, Georgia, HCMA offers outstanding parts availability, customer and dealer training programs, and a wide range of services and programs — providing outstanding support for Hitachi construction machinery. Backed by the global strength of Hitachi Construction Machinery Group, its employees, dealers and especially customers, HCMA is poised to make a major impact on the construction and mining equipment markets in North America and Latin America.

About Quake Global

Quake Global, Inc. designs and manufactures industrial machine-to-machine (M2M) devices for asset tracking and monitoring using satellite, cellular, GPS, RFID and other technologies for a wide range of markets, including heavy equipment, transportation, energy, healthcare and other segments, and serves such customers as Sumitomo, Komatsu, Volvo, Mayo Clinic, Kaiser Health, Cerner Corporation, Caterpillar, Hyundai, Doosan, John Deere and many others.

Quake Global Telematics Products

QConnect™

- ULTRA-COMPACT RUGGED GLOBAL CELLULAR MODEM
- Customize and unify your global asset tracking needs with QConnect. The global, IP67 rugged and programmable QConnect solves your telematics problems even in the toughest environments, that includes LTE / GPS / Wi-Fi / BLE / Ethernet.

Q4000

- SATELLITE AND CELLULAR DUAL MODE MODEM
- The industrial-grade Q4000 features cellular (LTE Cat M / NB IoT), satellite or dual-mode network configurations and fully programmable onboard applications with GPS.
